PROFILE SUMMARY

Android Developer with **2+ years of experience** building and maintaining production Android applications using **Kotlin, Java, Jetpack Compose, XML, MVVM, Retrofit, REST APIs, Room, DataStore, Coroutines, Firebase and Flow**. Hands-on experience troubleshooting **Android lifecycle, database, navigation, permissions, networking, and state-management issues**, with experience taking applications through **testing, Google Play Console review, and successful production deployment**.

EXPERIENCE

Android Application Developer Apr 2026 – Oct 2026

Self Project (Spend Dial) | (Play Store App Link - https://play.google.com/store/apps/details?id=com.spenddial.app)

- Developed and successfully launched **Spend Dial,** a production-ready **Smart expense and loan management application**, using **Kotlin, Jetpack Compose, Material 3, MVVM, Room Database, DataStore, Coroutines, and Flow**. Published the application on the Google Play Store and resolved complex Android database, navigation, permissions, and state-management challenges throughout development.

Software Developer (Android) Sep 2023 – Jan 2026

Capace Software Private Limited | (Bengaluru, Karnataka)

- Developed and maintained multiple Android applications & Collaborated with **cross-functional teams** to deliver **high-quality, responsive, and scalable mobile solutions**, **consistently meeting project deadlines and client requirements** while adhering to best coding practices.

SKILLS

Languages: Kotlin, Java, SQL, C++, JavaScript (Basics).

Android / Networking & Data: Android SDK, Jetpack Compose, Material 3, XML, Android Lifecycle, Coroutines, Flow, StateFlow, SharedFlow, Retrofit + OkHttp, REST APIs, JSON, Room Database, SQLite, DataStore, **Testing:** JUnit, Compose UI Testing, Android Instrumentation Testing.

Architecture & Concepts / Tools: MVVM, Clean Architecture, State Management, Offline Data Handling, API Integration, Android Studio, GitHub, Bitbucket, Postman, JIRA, Firebase, Google Play Console, **Dependency Injection:** Hilt, Dagger, **CI/CD:** GitHub Actions, Gradle.

Certifications: Salesforce Certified Associate (ForceArk Academy under TCS YEP), Web Development (Internshala).

PROJECTS

Spend Dial | Smart Expense Tracker App

- Developed and published **Spend Dial**, a production-ready Android expense management application designed to help users track, categorize, and analyze personal finances. Built the application using **Kotlin, Jetpack Compose, Material 3, Android SDK, Coroutines, Flow, Room Database, DataStore, and MVVM architecture**.
- Tested & resolved issues involving **Room migrations, database persistence, navigation, input validation, notification permissions, state management, and Android lifecycle behavior**. Successfully completed **Google Play closed testing, privacy policy compliance, release requirements, and production deployment**, with the application now **live on the Google Play Store**.

CapaceEdge | School Management App | Student-Parent Module

- Developed and maintained a production Android application using **Kotlin, Jetpack Compose, Material 3, MVVM, Retrofit, REST APIs, Coroutines, and Flow**, delivering scalable and responsive data-driven features. **Built 15+ dynamic UI modules including attendance, homework, student profiles, payments, chat/mailbox, and Google Maps-based bus tracking, integrating real-time application state with Compose and Flow.**
- Implemented **REST API integration, secure token-based authentication, Google Firebase based Notifications** & Integrated **Google Maps and location-based bus tracking** functionality to provide real-time transportation visibility for students and parents. Troubleshoot and optimized application issues involving **API failures, state management, lifecycle behavior, UI performance, asynchronous operations, and network handling**.

EDUCATION

Bachelors of Technology 7.71 CGPA Raebareli, UP

Feroze Gandhi Institute of Engineering and Technology 2019 – 2023
